

Welcome to nCNC/PSM
User Meeting in Milan,
Introducing some of the latest
measurements and discussing the
importance of sampling and
comparability.

The meeting will take place on Wednesday **9.9.2015 14:00-16:00** at the University of Milano-Bicocca, the venue of the EAC2015 conference. The meeting room location will be informed later – in any case you can drop by our stand at the EAC2015 to get the full information.

There will be snacks and beverages. The event itself is an informal discussion workshop. We have a few introductions, but you are welcome to bring up further topics to be discussed with your peers.

Agenda:

- 14:00 Welcome, *CEO Minna Väkevä, Airmodus*
- Introduction of the participants, focusing on the application / research area. *Everyone*
- Ambient measurements of 1-3 nm particles.
 - A short introduction by *Jenni Kontkanen, University of Helsinki*: **Comparison of PSM measurements around the world**, e.g. what has been observed and what to keep in mind in data analysis
- Traffic & Vehicle emissions
 - A short introduction by *Miikka dal Maso / Topi Rönkkö, Tampere University of Technology*: **Crucial aspects to urban measurements and latest news of vehicle emission measurements**, e.g. how to cope with fast changes in the sampled aerosol population
- The importance of sampling
 - A short introduction by *Alessandro Franchin, University of Helsinki*: **methods to increase the efficiency of measurements of 1-3 nm particles**
- Discussion and wrapping up the workshop by 16:00

To be able to reserve enough refreshments we appreciate if you inform us about your attendance. If you have any questions related to the workshop, please contact Elina Miettinen (elina.miettinen@airmodus.com) or Minna Väkevä (minna.vakeva@airmodus.com).
