# SAVE AND MONITOR DATA FROM MULTIPLE AIRMODUS PARTICLE COUNTERS

## USE YOUR CPCs FOR FAST SIZE DISTRIBUTION MEASUREMENT OR COMPARE CONCENTRATION DATA

The Airmodus MultiCPC software provides easy logging and monitoring of data from several Airmodus particle counters simultaneously. Take one look at the computer screen to see the status of your instruments and that data is being saved.

MultiCPC  
Airmodus MultiCPC Software

1 Hz DATA FROM SEVERAL AIRMODUS  
INSTRUMENTS SIMULTANEOUSLY

REAL-TIME SIZE DISTRIBUTIONS FROM CONNECTED  
INSTRUMENTS WITH DIFFERENT CUT-OFFS

SELECT WHICH DATA TO DISPLAY AND SAVE

PLUG AND PLAY—DETECTS CONNECTED INSTRUMENTS  
AUTOMATICALLY

## Airmodus MultiCPC software

The MultiCPC software enables, using several particle counters with different cut-offs—for example 1.3, 3, 5, 7, 10 and 23 nm—getting 1 Hz data of both total particle number concentrations and real-time size information, also from the fast-evolving aerosol processes.

- **Save and monitor data from multiple Airmodus instruments simultaneously**
- **Get real-time size distributions from connected particle counters with different cut-offs—with PSM even from 1 nm**
- **Take one quick look to see the clear indicators for instrument status and saving data**
- **Use instrument nicknames for easier identification**
